

A intelligent Data Privacy Management platform for enterprise compliance, IT and InfoSec Teams

Identify, Record and Assess your organizations data privacy footprint

Problem

- ▶ As a Privacy leader your biggest worry is identifying and mitigating the risks to your organizations data
- ▶ Regulations and laws are making your job increasingly more complex and opening your organization up to huge fines and the constant threat of reputational damage

Solution Overview

- ▶ PRIVEZI helps you to ensure that all your critical process and data assets are accounted for as per your regulatory and sectoral requirements.
- ▶ It helps you assess them for threats and risks by applying necessary controls based on the appropriate frameworks and provides a 360-degree workflow for managing subject access requests and consent

Key Benefits

- ▶ Effectively manage and scale your data privacy program in one place
- ▶ Meet regulatory requirements for DPDPB, GDPR, CPRA and many others
- ▶ Shorten response times for rights requests and build customer trust
- ▶ Proactively assess your privacy risks with in-built or custom questionnaires
- ▶ Monitor your privacy program through intuitive reporting and dashboards
- ▶ Customize your workflow across your entire privacy governance lifecycle
- ▶ Ensure consistency: Make sure your DPO and privacy team are all on the same page with the organization

How it Works

- ▶ Populate your assets and data inventories via excel imports or via API integration with existing systems
- ▶ Record: Build a comprehensive register of all your critical business process with details of people involved, data transfers and activities
- ▶ Assess: Build custom assessment questionnaires or use our in-built templates to run various assessments to identify your risks
- ▶ Risk Register: Apply risks based on multiple control frameworks in the system
- ▶ Track & Maintain: Data Subject requests and consent with managed workflows and dashboards

Deployment

- ▶ Flexible and agile
- ▶ SaaS (Software-as-A-Service)
- ▶ On-Premise
- ▶ White labeling and Co-Branding options
- ▶ Quick and easy deployment via configurations
- ▶ Dedicated team for system implementation

Customer Centric

- ▶ Customer On-Boarding with minimal manual intervention
- ▶ Ability for Company user to define Organization Structure
- ▶ Intuitive Template Form Builder
- ▶ Multi-Lingual Interface (e.g. Arabic)
- ▶ High-availability when deployed in SAAS mode
- ▶ APIs for Third Party integration for Customer specific needs

About Us

PRIVEZI helps organizations operationalize privacy, security, data governance, and compliance programs. We are differentiating ourselves by providing Data & Privacy compliance solutions with a strong focus on ease of use, adaptability and customizability.
